Science for Little Peeps

featuring

PEEP and the Big Wide World™

Join us for a day of science activities for kids ages 3-6, inspired by the popular TV series, *Peep and the Big Wide World*. **Exploring Structures**, an actual hands-on activity from the show, helps children explore structural science concepts. Pre-registration is recommended: Call 919-220-5429 ext. 313. Local child authors **Miles & William Raben** are on hand to sign their book *My Grandmother's Backyard*. Other activities include **child development experts** to answer questions and **early childhood health activities** in *The Lab*.

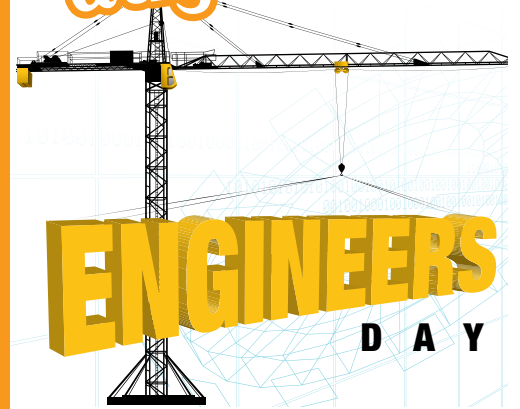

july 12

Dig This!

Dig in at Dino Day and learn about paleontology. **Try out our new Fossil Dig Site before it opens – collect and bring home your own fossils!** See hundreds of real fossils and talk with N.C. Fossil Club members about their collecting adventures. Programs for adults, families and children including **lectures, dinosaur drawing and paleoartists, story times and more.**

august 16

Explore and experience the fascinating world of engineering! Join Triangle area exhibitors including **Duke University and IBM** for hands-on demonstrations and activities that are fun and educational for people of all ages. **The day will feature our new soundSpace: Hear Motion**, an interactive music installation where movement is converted into sound. soundSpace shows you that technology is a fun and creative medium that anyone can master.
